RIGID ADHESIVE TAPE -

Traditional approach to providing support to joints and body parts for injury prevention or injury management. Used when there is a need to restrict the range of motion of a given joint. Proper taping techniques can aid in the treatment of a wide range of painful musculoskeletal conditions such as lateral epicondylitis (tennis elbow), plantar fasciitis, osteoarthritis, anterior knee pain, patellofemoral pain syndrome, and shoulder impingement syndrome. Most common is a rigid ankle taping technique that helps improve joint position sense.

Adhesive tapes can be manufactured in two main ways, porous and non-porous. Porous tape is manufactured in a manner which facilitates breathability without compromising strength. Sweat vapor moves through the tape which provides greater comfort, especially to those with sensitive skin. Non-porous tape is the traditional approach to tape, where the adhesive coats the entirety of the tape surface. Both processes are beneficial based on your preference.

Porous

TAPING ACCESSORIES

1. M Tac® A non-aerosol pre-tape spray that helps MTape® and MWrap® stick better.

131301N 237 g pump spray 12/cs

2. Tuffner® Quick Drying Spray An easy-to-use tape adherent that helps tape and wraps stay in place better, longer.

170211 113 g aerosol spray

170210 283 g aerosol spray

3. Tape & Tuffner® Remover Removes pre-tape spray and adhesive particles from skin, counter tops and taping benches.

200500 113 g pump citrus spray 12/cs

200103 1 liter 12/cs

200104 1 gallon

4. Heel & Lace Pads Thin layer of foam to help reduce friction inside shoes, works great with lubricating ointment.

080202 7,6 cm x 7,6 cm perforated pads 0,1 cm thick 2,000 count with dispenser

5. Petroleum Jelly Classic lubricant for friction prone areas.

160201 0,4 kg jar 12/cs (team)

160202 2,2 kg 6/cs (team)

160203 11,3 kg drum (team)

6. Lubricating Ointment Non-friction ointment containing lanolin.

120201N 85 g tube 12/cs (team)

120202N 0,4 kg jar 12/cs (team))

120203N 2,2 kg jar 6/cs (team)

120204N 11,3 kg drum (team)

TAPING SCISSORS

1. Bandage Scissors Features an angled blade with blunt ends for quick removal of bandages, tape and more.

020301 one scissors

MSRP: \$9.99 USD

2. Bandage Shears Features paramedic-grade stainless-steel construction to cut through straps, padding, clothing and tape.

020302 one shears

MSRP: \$9.99 USD

3. Emergency Shears Features pointed high-carbon steel blades sharp enough to cut off face masks.

020351 one shears

MSRP: \$32.99 USD

4. M Cutter™ Safely slice through stiff athletic tape and wraps.

100201 one cutter 12/cs

MSRP: \$12.99 USD

100202 replacement blades 10/pk

MSRP: \$56.99 USD

5. Economy Tape Cutter Make removing MTape® or other athletic tape easy.

200201 one cutter 24/cs

MSRP: \$9.99 USD

200301 replacement blades 10/pk

MSRP: \$14.99 USD

6. Kinesiology Scissors Ideal for precise cutting of kinesiology tape without fraying the edges.

020328 one scissors

MSRP: \$36.99 USD

7. Super PRO 11 Scissors Made from a high carbon, hammer forged chromed steel with a small, easy to maneuver safety tip.

01111 one scissors

MSRP: \$68.99 USD

8. Super PRO 11T Scissors Made from a high carbon, hammer forged chromed steel. Advanced fluoropolymer non-stick coating.

01112 one scissors

MSRP: \$80.99 USD

9. Super PRO 21 Scissors Constructed with extra-sharp diamond honed stainless steel blades and comfort handle.

01211 one scissors

MSRP: \$66.99 USD

10. Super PRO 21T Scissors Constructed with extra-sharp diamond honed stainless steel blades. Advanced fluoropolymer non-stick coating.

01212 one scissors

MSRP: \$76.99 USD

11. Super PRO 21L Scissors Left handed. Constructed with extra-sharp diamond honed stainless steel blades and comfort handle.

01213 one scissors

MSRP: \$36.99 USD

MUELLER HERO® KITS

Mueller® Hero® Athletic Trainer kits are customizable with interchangeable accessories. The kits are made with a rugged, lightweight nylon exterior with reflective piping for increased visibility in low light. The panels are water-resistant where it is needed the most. A fully-open design lets you unzip bags completely for easy packing and unpacking of your gear. The premium zipper, handles, and pockets are built to last; and we back these kits with a one year warranty.

Your possibilities are endless with the customizing options of the Mueller® Hero® Athletic Trainer Kits!

RECOVERY CARE

BUILT IN SPORT. MADE FOR LIFE.®

RECOVERYCARE REVIVE®

Accelerate recovery, reduce pain, and improve performance with new Mueller® REVIVE® Compression Technology. By stimulating the body's natural circulation with precise levels of pressure, REVIVE®'s innovative compression sleeves, console, and 30% overlapping chambers promote faster recovery before, during, and after workouts, activity, or just standing on your feet. Gear packs consist of console and leg sleeves only. Backed by a 90-day risk-free trial. This adjustable system optimizes your recovery with a personalized range of therapeutic pressure. The durable, portable, and lightweight unit is hassle-free, simple to clean, and powered by 8-hour battery life.

Only available out of Netherlands warehouse

RecoveryCare REVIVE® M4 Gear Pack

The M4 offers 5 unique treatment programs, including a fully customizable program, and is enhanced with Bluetooth technology to track personalized treatments on your mobile device.

Mesh Carry Bags

THERM-X® = HEAT + COLD + CONTRAST + COMPRESSION

Imagine not having to keep refilling, cleaning and drying out your ice based machine. Imagine being able to maintain the specific temperature you want delivered to the patient, for as long as you want. Then consider the new treatments you can apply with heat, compression, and contrast.

This innovative technology allows the user to select Heat, Cold, or Contrast - temperature range of 34° F to 110° F.

With its digital control, the Therm-X® circulates a coolant that can maintain a specific temperature for the entire treatment cycle. Compare this to heat packs or ice-based machine that lose temperature once they are applied.

THERM-X® GARMENTS

Therm-X® garments are bilateral so you don't have to buy lefts and rights. They're one size fits all, and have high-end Velcro to last the life of the garment. The inner face uses a ripstop nylon with

THE ACHILLES

BUILT IN SPORT. MADE FOR LIFE.®

The Mueller Achilles provides full coverage, multidirectional resistance to support strength, stability, and mobility in the foot, ankle, and lower leg. Its structured design surrounds the joint for consistent tension in every direction, allowing smooth transitions between movements without re-anchoring. Adjustable band positioning enables targeted muscle engagement, making it ideal for athletic conditioning, performance training, and foundational lower leg strength work.

SKY™ ANKLE STABILIZER

HEALTHY ANKLES?

KEEP THEM THAT WAY!

The first of its kind, Mueller has done it again- revolutionizing the game by preventing sprains and keeping you in top form. Ideal for securing protective padding, equipment, or ice bags. This patented, low-profile ankle stabilizer lowers the risk of a significant inversion injury when landing a vertical leap, as seen commonly in basketball and volleyball players

Velcro® secure straps functionality

Contoured left/right specific design to align with proper anatomy

Curved shape mimics the tape application

Low profile design for minimal bulk in shoe

Semi-rigid stabilizer allows for normal foot flexion and functionality

ANKLE SUPPORTS

These are the simplest type of ankle braces. They provide the least support for activities such as light jogging and walking. However, they are ineffective for intense activities, although they do help in reducing inflammation as the result of injuries.

RIGID ANKLE BRACES

These braces come in either stirrup or lace-up styles. A stirrup brace, which provides the most protection, lets you move up and down while protecting your ankle from rolling either in or out. These braces are built of a rigid structure that contain plastic panels to protect your ankle from inversion and eversion. A gel or air filled cushion may be part of the brace to help provide comfort to injured ankle.

Breathable Material
*Moisture management
fabric with superior softness
and comfort*

PATENTED

TRIAxIAL HINGE

Single axis and polycentric hinges were designed prior to research that measured the geometric characteristics of knee motion. All other hinges, regardless of misleading names like "multi-centric", are still simple single axis or double axis hinges which are proven to promote a mechanical mismatch that induces brace migration.

NEAR-NORMAL HINGE MOVEMENT

A functional knee brace must produce near-normal joint motion with minimal restrictions. These criteria may be obvious, but clearly many ACL braces fail to meet them.

SHIFT

The posterior shift of the instant center of the knee (I to II). The corresponding femur-tibial contact point.

DISPLACEMENT

Posterior displacement of the sphere centers on the femoral condyles.

COMPARISON OF BRACE HINGE DESIGN

The simplistic movement of single axis and polycentric hinges are incompatible with the complex motion generated by the knee.

SINGLE AXIS HINGE

Hinge design is fixed at the center pivot and exhibits no posterior displacement.

BIAXIAL HINGE

Two centers of rotation allow only minimal posterior displacement.

TRIAxIAL HINGE

The instant center is always posterior of the central axis and reproduces the near-normal posterior pathway of the knee

HINGE BIOMECHANICS

Measurements in the posterior movement of the rotation center in all three types of hinges available are compared to that of a normal knee. Only *Mueller's Triaxial Hinge* properly tracks the joint.

MILLIMETERS OF POSTERIOR MOVEMENT FROM 0° TO 120° OF FLEXION

THINGS TO CONSIDER WHEN CHOOSING A KNEE BRACE

1 WHAT TYPE OF KNEE BRACE DO I NEED?

Knee braces can be categorized into five types: hinges, stabilizers/braces, supports, sleeves and straps. Hinged knee braces contain hinges which allow the knee to move in a way that is close to the knee's natural motion for the most advanced support, while knee stabilizers/braces contain metal springs on both sides of the knee for advanced support. Knee supports can be adjustable and often wrap around the knee; both provide basic support along with warmth and compression, while knee sleeves are sized and can be slipped on over the knee. Basic knee straps can be used to help relieve various knee pains.

2 WHAT STYLE OF KNEE BRACE DO I WANT?

There are two basic styles of knee braces: slip on and wraparound. Slip on braces are slid onto the knee by placing your foot through the brace's opening and pulling up. This type of brace is sized, as the ideal fit is necessary for proper support. Wraparound knee braces can be placed either in front of or behind the knee, depending on the type, and adjusted with the brace's Velcro straps.

3 DO I WANT A KNEE BRACE WITH A CLOSED OR OPEN PATELLA?

Knee braces are made with a closed patella for those who want their knee cap to receive the same compression and support provided to the rest of the knee. Open patella knee braces allow for any pressure on the knee cap to be relieved, and depending on the particular knee brace, may also allow for additional support and/or proper tracking and movement of the knee cap.

HINGED KNEE BRACES

This type of brace is designed to decrease knee pain and provide stability. They come with hinges that provide sideways stability. A hinged knee brace will keep a knee from bending back too far. With this type of brace, a person is able to determine how much their knee will bend and straighten. Hinged knee braces are able to provide a person with the maximum protection and support.

KNEE STABILIZERS & BRACES

Knee Stabilizers & Braces use supportive steel springs on both sides of the knee to help keep it supported but still allowing the joint to move normally. This type of brace is best used for stiff, sore, or floating knees.

KNEE SUPPORTS

Knee supports provide support to the knee without interfering with natural range of motion or immobilizing the joint. The level of support is different based on the features present in the support. Some have a basic slide on design that provides comfortable compression, while others have adjustable straps for a more customized compression.

KNEE SLEEVES

Knee sleeves are not the same as knee braces. Knee sleeves provide some support to the knee, but do not hinder its natural range of motion or immobilize the joint in any way. This makes knee sleeves unsuitable for providing support after a knee injury or surgery, but rather they are designed to protect the knee from future injury or risk of further damage to an injured area. This protection is particularly important for athletes that put their knees under pressure every day in activities like running, jumping, or weightlifting.

Knee sleeves also add a valuable compression element which help increases blood flow to the area and reduces pain both during and after a workout as well as any post-workout swelling. The neoprene material that knee sleeves are made of make knee sleeves an excellent option to wear post-injury as they provide some support but still allow the knee to strengthen naturally.

KNEE STRAPS

Knee straps are designed to compress the tendons surrounding the knee and help redistribute the tension. There is also some evidence that knee straps can be used to keep tendons properly aligned. Knee straps can be worn above or below the knee, depending on the knee injuries plaguing the athlete.

	Max Knee Strap	Advance Patella Strap	Jumper's Knee Strap	ITB Strap
Sizes Available	OSFM SM/MD; LG/XL	OSFM	OSFM	OSFM

MUELLER GREEN

EARTH FRIENDLY

BRACES & SUPPORTS

Mueller Green is created from a material made without the use of petroleum, and the green inner lining is manufactured with 67% recycled plastic PET bottles. The spandex binding is made from 73% recycled materials. Even the packaging is recyclable and printed with soy-based inks, bringing our commitment to the earth full circle.
